24. Description of Change: (use additional Sheets if necessary) We need an IBM machine that has 4.2 OS installed in order to complete an SCF release of EOSView. Note that the baseline OS version is 4.3; but, we need to regress to 4.2 to use xvt for the release. After the build on 4.2 is done (should only take a day), we will re-install 4.3 onto cle9ibm (another CCR will be put in).						
25. Proposed Solution: (use additional sheets if necessary) Install 4.2 OS onto cle9ibm.						
26. Alternate Solution: (use additional sheets if necessary) N/A						
27. Consequences if Change(s) are not approved: (use additional sheets if necessary) We will not have verified and built this SCF release of EOSView on one of its intended platforms.						
28. Justification for Emergency (If Block 15 is "Emergency"): We are several months behind on completing this release; and this OS is our last hurdle.
